PlanStreet HMIS collects and aggregates client specific, confidential information on local homeless populations. This information includes Universal Data Elements, Street Outreach Programs, Income & Health details, and Outcome/Self-Sufficiency

Measures about individuals who take part in programs within homeless service systems. PlanStreet serves as the HMIS for public sector agencies and nonprofit organizations for the following programs:

Information gathered on the above programs is collected and organized, it can be shared with federal and state agencies to assess needs and secure funding. Collaboration between agencies is a hallmark of what makes homeless management information systems useful and unique. Information gathered on the local level can be combined with data from other locales in order to form regional and even national trends and analysis.
